

# Flo charger locations

## Flo charger locations

FLO is Canada's largest EV charging network and one of the biggest public charging service providers in continental North America. FLO is installing charging stations for electric car drivers across the States and the Provinces, from bustling cities like Toronto and New York to the remote regions of Alaska and Saskatchewan.

The FLO network has various EV charge points spread around Canada and the US. You'll find Level 2 chargers (for business locations and day-stay parking lots) and DC Fast Chargers (DCFCs, colloquially known as Level 3 chargers).

Most Level 2 chargers are equipped with SAE J1772 connectors with either 6.2 kW (the most common) or 7.2 kW of power delivery. FLO's Level 3 chargers typically deliver 50 kW of charging power, while there are also 25 kW and 37 kW models available to cope with specific vehicle charging capabilities as well.

Charging your vehicle at a FLO station is simple. You don't need to become a FLO member to use their facility (although there are a few reasons it's a good idea!).

Most FLO charging stations typically charge by time rather than per kWh. While each one is different, here's what you should expect. You can use FLO charging stations in either Canada or the US, and make payments in either currency.

Most Level 2 FLO charge stations cost CAD 1.50 per hour (and most are 6.2 kW). However, prices may vary between locations. Some charge points are free to use; some are CAD 1.00 per hour, up to CAD 2.50 per hour plus a standing charge.

In the States, prices vary significantly. You'll find a good number of free charging stations. Most are either a flat rate of USD 2.00 per hour or USD 1.00 to USD 1.50 for the first hour or two, with a significant price increase for any subsequent time.

Level 3 FLO charge points usually cost CAD 20.00 per hour or CAD 0.25 per minute, which are equivalent to CAD 0.33 per minute or CAD 15.00 per hour, respectively. You'll also see these price conversions listed on some stations.

There aren't many DCFC charge points in the US yet. However, with the existing few Level 3 FLO charge points in several states, they have a few price ranges below:

As a FLO member, you can pay your charging bill via your account balance. You can link your credit card to your FLO account to pay for the bill directly or add credit to your account.

## Flo charger locations

The FLO EV charging network is committed to expanding its network, providing seamless connectivity and a reliable charging experience to meet the growing demands of EV drivers.

1. FLO App: Create an account, add funds via credit card, or use it as a guest. 2. FLO Card: Link your card to your account and manage payments through the app or FLO website.
