## Floor mounted electric car chargers

Business owners of Twin Chargers can set several options regarding visibility, accessibility and payment for the chargepoints using our Site Management Service .

They can be displayed on public mapping, or hidden for private use. Access can be completely free and "plug-and-play", or require the charge event to be confirmed by the driver in the Pod Point App. Business owners also have the ability to set whatever fee they see fit, with payment via the app interface.

Wi-Fi is generally a more reliable connection, but GSM is often more appropriate for external locations. Twin Chargers also have fail-safes in case of comms failure, that ensures drivers' cars continue to charge.

The Twin Chargers can charge at 22kW if three-phase power is available. However, the vast majority are 7kW meaning they are suited for locations where cars are normally parked for periods of 45 minutes or more.

FREE Delivery is available to Prime members. To join, select "Try Amazon Prime and start saving today with FREE Delivery" below the Add to Cart button and confirm your Prime free trial.

Important: Your credit card will NOT be charged when you start your free trial or if you cancel during the trial period. If you're happy with Amazon Prime, do nothing. At the end of the free trial, your membership will automatically upgrade to a monthly membership.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

EV OneStop are please to offer a range of floor mounted charging points. From the lowest costing EV charging pedestal "BasicCharge" on the market (suitable for workplace and leisure locations), to the contemporary Quantum pedestal.
