

Foldable solar panel for backpacking

Foldable solar panel for backpacking

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

"I'm so sad that I didn't try this panel until now. It doesn't work and the return window is closed. So disappointing ?..." [Read more](#)

"...for the Nomad 10 because it strikes a good balance of wattage, size, durability, weatherproofness, and weight and I'll be using it primarily for..." [Read more](#)

"... 's obvious that it is very well-made. I gave a four stars on the water resistance because obviously the USB port itself is not water resistant...." [Read more](#)

"...I opted for the Nomad 10 because it strikes a good balance of wattage, size, durability, weatherproofness, and weight and I'll be using it primarily..." [Read more](#)

Our elite testing team analyzed each panel's charging abilities, determining that not all 100-watt solar panels are equal. We took these panels out on cheerful, sunny days and dim, overcast conditions, testing them side-by-side to see how they stack up.

The best solar panel for camping in our testing was the Jackery SolarSaga 100. It impressed our testers with its light weight and efficient energy conversion. The BigBlue SolarPowa 100 ETFE was the best value, providing great charging speed, light portability, and a great price tag.

With our detailed testing, we also determined the best all-weather option and the most portable models, along with other notable contenders. Read on to see how they stack up and which option will best fit your needs.
