

Fronius 15kw mppt inverter

Fronius 15kw mppt inverter

The transformer-less Fronius Primo-15.0 is the ideal compact single-phase 15.0 kW inverter for residential and small-scale commercial installations. In accordance with ESA rules for residential applications, the Fronius Primo can operate efficiently at a maximum input voltage of 600 V. And for increased efficiency and additional cost savings for commercial applications, the Fronius Primo can operate at the maximum input voltage of 1,000 Volt.

It has a extra wide DC input 150VDC - 1000VDC (600VDC max. for residential installations). It has a Dual MPPT input with very wide MPPT operating window of 320VDC to 480VDC for ultimate ease of array design. This unit features built-in Integrated wireless datalogger, free monitoring, SunSpec Modbus interface for seamless monitoring and datalogging. It is NEC 2011 (AFCI) and is 2014 (Rapid Shutdown) compliant and uses the Fronius standard SnapINverter Mounting system and Advanced Grid Features.

The transformerless Fronius Symo is the three-phase inverter for systems of every size. The high system voltage, wide input voltage range and two MPP trackers ensure maximum flexibility in system design. The standard interface to the internet via WLAN or Ethernet and the ease of integration of third-party components make the Fronius Symo one of the most communicative inverters on the market.

o 3-Phase Transformerless
o Integrated 6-string Combiner
o Single MPPT
o To NEC 2011 (AFCI) and 2014 (Rapid Shutdown) ready (requires certified disconnect within 10" of the array)
o SnapINverter Mounting System
o Advanced Grid Features
o 200VDC - 600VDC Input Range
o Data Manager Card not included (In multi inverter systems, use only one Data Manager card, up to 99 Symo LITE units can attached daisy chained together for monitoring).

FRONIUS Primo Inverters | Transformerless, lightweight. Choose from 3800 watts to 15000 watts | Arc Fault Protection | 208/240 VAC; inverter includes dual MPPT inputs & system monitoring

The Fronius Primo line of inverters range in size from 3.8 kW to 15 kW and are ideal for residential applications. The inverters are transformerless and lightweight for easy installation and set up. The inverters use the SnapINverter Hinge Mounting system that enables the unit to be installed even without tools and also allows for easy removal of the inverter from the mounting plate if needed.

The Primo comes with dual MPPT (multi point tracking) inputs which allow for two exposures with differing string lengths; in addition, and a wide system voltage range gives more flexible design options. Communications are simplified with the preinstalled WiFi Data Manager 2.0 card and the system can be monitored via the Fronius solar.web capability on a computer or phone. Alternatively the RS486 port can be used for connecting to the computer.

Fronius 15kw mppt inverter

The Nema 4X enclosure is rugged enough for harsh environments. The Fronius Rapid Shutdown box is NEC compliant and if AC is not detected, the Rapid Shutdown is automatically triggered. One Rapid Shutdown box is needed per string.

UL 1741-2010, UL1998 (for functions: AFCI and isolation monitoring), IEEE 1547-2003, IEEE 1547.1-2003, ANSI/IEEE C62.41, FCC Part 15 A & B, NEC Article 690, C22. 2 No. 107.1-01 (September 2001), UL1699B Issue 2 -2013, CSA TIL M-07 Issue 1 -2013

Fronius Primo 3.8-1 3800 watt inverter, Fronius Primo 5.0-1 5000 watt inverter, Fronius Primo 6.0-1 6000 watt inverter, Fronius Primo 7.6-1 7600 watt inverter, Fronius Primo 8.2-1 8200 watt inverter, Fronius Primo 10.0-1 10,000 watt inverter, Fronius Primo 11.4-1 11,400 watt inverter, Fronius Primo 12.5-1 12,500 watt inverter, Fronius Primo 15.0-1 15,000 watt inverter
