

Green electricity bangkok

Asia's most comprehensive energy exhibition and conference that blends pragmatic energy solutions with cutting-edge technologies to power the global energy landscape

Asia, the world's largest energy market, currently accounts for nearly 50% of global energy consumption. With rapid economic and population growth expected, the region's approach to achieving low-carbon, sustainable energy systems will be crucial in shaping the global energy transition. Asia's ability to balance sustainability with economic growth, inclusivity, and security will define the future energy landscape.

The region faces unique challenges in this journey, including rapid urbanization, growing energy demands, and the need for energy security. Future Energy Asia leads this transition, bringing together stakeholders from across the energy value chain to accelerate decarbonisation, electrification, and resilience through collaboration and innovation.

A successful energy transition in Asia requires pragmatic strategies that provide affordable, secure, and sustainable energy while driving economic growth. This involves investment in new energy sources, integration of renewables, energy efficiency technologies, and robust policy frameworks.

Future Energy Asia is a pivotal, world class event dedicated to shaping and enabling Asia's future energy landscape. The expansive exhibition and high-level conferences will once again gather global experts to address the region's most pressing energy challenges and help create a new wave of opportunities for growth and innovation.

dmg events is an international exhibition and conference organiser, publisher and information provider to the Energy, Construction, Plastics, Coatings, Manufacturing, Transport, Security, Interiors and Hospitality industries.
