

Grid-scale energy storage madrid

A request for environmental impact study, construction and grid connection for the project in Cuenca, Castilla La Mancha, has been submitted to relevant authorities by the firm "WIND GENERATION CASTILLA LA MANCHA, SL"; according to the Spanish government's state bulletin service.

Both the solar and storage portions would be connected to a newly-built substation via 33kV interconnection lines, which would be managed by Generaci?n E?lica Castilla la Mancha SL,

The bulletin said the BESS would be used for the commercialisation of the generated energy. The plan is also to hybridise the solar and storage plant with the nearby GECAMA E?LICO Park PV farm, which is being developed by developer Israeli Enlight Renewable Energy with a total power output of 300MW.

Spain has had a target of 20GW of energy storage deployment by 2030, rising to 30GW by 2050, since 2019. See all Energy-Storage.news coverage of the market here.

Energy-Storage.news" publisher Solar Media will host the eighth annual Energy Storage Summit EU in London, 22-23 February 2023. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.
