Located in southern Okayama Prefecture, Tamano City neighbors the shores of the Seto Inland Sea and is blessed by the mild climate and lush natural scenery. Once home to the largest shipbuilding yards in Japan, Tamano City is relatively protected from earthquakes and other natural disasters. Its main port, Uno Port, is the major gateway to Setouchi Islands as well as a venue for the international art festival, Setouchi Triennale.

Hello, Tamano City !An idyllic port city that was once home to Japan's shipbuilding industryTo accelerate the shift to renewable energy, PowerX is committed to delivering energy storage solutions, a quintessential part of the new power infrastructure, as well as creating a symbiosis between nature and industry. We envision Power Base as the starting point of a sustainable, tech-driven future, and we look forward to building that future with the people of Tamano City.

5GW battery assembly plant in JapanPilot production starts in 2023 and product delivery by Spring 2024Power Base is PowerX's first ground-up battery production site in Japan with 5GWh of annual capacity. With a pilot production scheduled in 2023 and product delivery in early 2024, Power Base, featuring automated production lines and cutting-edge research laboratories, will set new standards for manufacturing._

Huawei's flagship Residential Solar ESS product, the LUNA2000-7/14/21-S1 (Huawei LUNA S1), represents a significant leap in home energy solutions technology.

With exceptional energy efficiency and enhanced safety features, it offers a pleasant user experience and transforms the way homeowners consume and store energy, while providing numerous benefits to installers.

In response to pressing challenges faced by the industry and consumers alike, innovative technologies are needed. One crucial challenge is the urgent demand for a 'green revolution'.

Homeowners now recognise the importance of using renewable energy and want to contribute positively to the environment. Soaring electricity prices and frequent power outages are also pushing people for renewable energy solutions. The market needs to adapt to these dynamics.

In this case, residential energy storage systems (ESS) have emerged as game-changers, empowering homeowners to fully utilise solar energy and reduce their carbon footprint.

Huawei's latest offering, the Huawei LUNA S1, tackles these issues head-on by providing security, simplicity, excellent user experiences, and sustainability.

Huawei's flagship Residential Solar ESS product incorporates innovative technologies to optimise energy usage and achieve energy savings with its up to 15-year limited warranty[1], which is at the forefront of the industry.

Additionally, the system utilises custom-designed 280Ah battery cells, surpassing the industry-standard 120Ah cells. As stated by Huawei, this results in the excellent usable energy capacity (4.2MWh), which is over 40% higher compared to other vendors Huawei has achieved these breakthroughs through its innovative module architecture and patented temperature control systems.
