

## Kosovo industrial microgrids

The Prime Minister of the Republic of Kosovo, Albin Kurti, together with the Minister of Industry, Entrepreneurship and Trade, Rozeta Hajdari, participated in the inauguration of the start of works for the construction of the Industrial Park in Drenas.

On this occasion, Prime Minister Kurti said that what they are doing with a special focus is to make the transition from non-functionalized economic areas to specialized industrial parks, green industrial parks and technology and innovation parks.

The Prime Minister of the Republic of Kosovo, Albin Kurti, together with the Minister of Industry, Entrepreneurship, and Trade, Rozeta Hajdari, participated in the inauguration of the commencement of works for the construction of the Industrial Park in Drenas.

Prime Minister Kurti, on this occasion, stated that what we are particularly focused on is transitioning from non-functional economic zones to specialized industrial parks, green industrial parks, and technology and innovation parks. Furthermore, the Prime Minister stated that these industrial parks are evidence that we not only believe in free competition among businesses, but also facilitate collaboration among businesses for added value.

Park Drenas 2 is expected to be as green as possible, with access to renewable energy, waste management facilities, and similar features, and it will serve our businesses with innovative activities to increase recycling in production and contribute to the development of the green industry.

Initiated by the Ministry of Industry, Entrepreneurship and Trade, as well as the KIESA agency, this park will cover an area of 36.5 hectares, will be owned by the Government, will have an investment of 7.7 million euros, and will provide space for 50 manufacturing businesses, including those with innovative activities that will contribute to and benefit from the circular economy.

In this event, the Mayor of the Municipality of Drenas, Ramiz Lladrovci, and the Member of the Assembly of the Republic of Kosovo, Enver Dugolli, were also present.

Honorable Mayor of the Municipality of Drenas, Mr. Ramiz Lladrovci, Honorable Minister of Industry, Entrepreneurship and Trade, Ms. Rozeta Hajdari, Honorable Member of the Assembly of the Republic, Mr. Enver Dugolli, Honorable representatives of businesses and business associations, Honorable employees of the Ministry, especially those of KIESA, Ladies and gentleman,

This week we are starting off well and with other work for the benefit of the citizens and the state. We just came from Izvori, from Zveçan, where we laid the foundation stone for the new police substation, and now we

are here in Drenas, as we inaugurate the start of construction for the General Industrial Park 2, at the 22nd kilometer along the Prishtina - Peja highway, in the village of Korretica e Epërme, opposite the existing Business Park in this municipality.

With good governance and developmental policies, we are empowering the country's economy and supporting the manufacturing sector to unleash its full potential and contribute more effectively to sustainable and inclusive development for the citizens of our country. Thus, a development that withstands the test of time and a development that leaves no one behind.

Supporting the establishment of modern industrial parks with features suitable for environmental protection is one of our governmental measures within the framework of the Industrial Policy 2030, with primary objectives for expanding industrial production, facilitating circular and green industry, generating better and inclusive employment, increasing the participation of inputs, local resources in production, and reducing the industrial trade deficit.

Park Drenas 2 is expected to be as green as possible, with access to renewable energy, waste management facilities, and similar features. All these are essential for the production of carbon-neutral products, as our exports are increasing and this tax, which subsequently raises the cost of production, will be paid more and more.
