The authors gratefully acknowledge the financial support of the Chinese Academy of Sciences Comprehensive Strategic Cooperation Projects in Guangdong Province (Nos. 2011B090300095 and 2012B09040018), the Chinese Academy of Sciences Knowledge Innovation Project (KGCXZ-EW-323), the Shenzhen Strategic Emerging Industries of Special Funds Financed Projects (No. JCYJ20140417113430702), and the Technology Innovation Project of Shenzhen (No. CXZZ20130322161447244).

Energy and environmental problems have become ever more important in recent years (Qadeer et al. 2023). This has generated great social concern which has been transferred to the field of science and has led to the development of a bibliography focused on the study of the environmental impact associated with the life cycle of the different types of batteries (Arshad et al. 2022; Zhou et al. 2023). In the field of Li-ion batteries, various researchers explored the impact associated with the life cycle.
