

Limitless lithium cyber 12k

Limitless lithium cyber 12k

A: lithium is 4x more powerful, 10x lighter, safer and will last 10x longer than any other battery type available for your Bike. Lead acid and AGM batteries can't compare in any way to lithium batteries performance. When you break down the cost over the full lifespan of each battery you will see that the Limitless Lithium battery ends up being the lower cost option over the life of the battery.

A. AGM is an Absorbent Glass Mat battery. A Lead Acid battery is what comes standard in most Motorcycles. Both Lead Acid and AGM are normally heavier and will go die much faster than a lithium. The discharge curve is drastically less than a lithium battery. See our discharge graphs on our website for more information about comparing lithium to traditional batteries.

One thing every basshead is always worried about when putting together a system is what batteries to use! Well while not only trying to stay on top of the latest technology and needs of our customers, price is also a factor! We did our research, we asked what you guys wanted, and we ended up with the Cyber Series!
