## Lithium battery pack 12 kWh

Meet Sol-Ark, the all-in-one hybrid solar power center that can handle anything you throw at it. Connect this 12.0 kW Sol-Ark + Fortress battery kit to the grid for an easy home battery backup solution. Or, install it as a fully independent system to deliver power to remote off-grid locations.

Not only does Sol-Ark's cutting-edge hybrid inverter work in any solar application (grid-tie, off-grid or battery backup systems), it can automatically detect connection to the grid and switch between on-grid and off-grid applications seamlessly.

This pre-designed solar kit contains the core components you need to go solar on your terms, including solar panels, a power center, racking, batteries and battery enclosure. Whether you install your solar panels yourself or hire a local contractor to assemble your system, GoGreenSolar's kits give enterprising DIYers a way to save money on their solar project vs. outsourcing it to a turnkey solar provider.

Some permit applications may require one or more plan revisions and resubmissions. Please supply us with all information necessary to make these revisions. Permit must be applied for with the city within 30 days of delivery of the permit package and any resubmissions must be resubmitted within 14 days of receiving the revised plans.

Our guarantee does not apply to installations on unsafe structures, unpermitted structures, ground mounts, structural engineering, structures not constructed to local building codes and other atypical building designs. This guarantee only applies to our standard solar system kits, it does not apply to custom orders or solar systems not designed by our engineers.

These solar batteries are rated to deliver 12 kilo-watt hours kWh per cycle. Check your power bills to find the actual kWh consumption for your home or business. Find the average per day and the peak daily kWh consumption. We have solar battery packs available that provide power storage from 1kWh to more than 100 kWh. Learn the price of 12kWh backup battery power storage for the lowest cost 12kWh batteries.

A kilo-watt hour is a measure of 1,000 watts during one hour. The abbreviation for kilo-watt hour is kWh. So 1,000 watts during one hour is 1 kWh. The power company measures energy in kWh in order to calculate your monthly bill.

As a leading manufacturer and supplier of lithium batteries, BSLBATT has consistently been at the forefront of the transition to renewable energy. Over the past years, we've delivered high-performance, cost-effective solar lithium battery solutions for residential and commercial energy storage.

As one of the major players in renewable energy, BSLBATT is often active at various popular solar and
