

## Lithium price chart usd 2023

Lithium - data, forecasts, historical chart - was last updated on November 29 of 2024. Lithium decreased 18,300 CNY/T or 18.96% since the beginning of 2024, according to trading on a contract for difference (CFD) that tracks the benchmark market for this commodity.

Metal Spot Price Charts Lithium Price Chart (USD / Kilogram) for the Last Year. Use this form to dynamically generate charts that show metal prices in the units of your choice and for the specified date range (if available). Simply select a metal and a unit to display the price.

Lithium Metal price historical Data. SMM brings you current and historical Lithium Metal price tables and charts, and maintains daily Lithium Metal price updates.

Trade with lithium price data that is unbiased, IOSCO-compliant and widely used across the energy commodity markets. Our lithium prices are market-reflective, assessing both the buy- and sell-side of transactions.

You need transparency and clarity in these volatile markets and we recognize the importance of being clear about our lithium price assessment and index process. Our independently audited lithium pricing process aligns with core IOSCO principles. Our price reporters are required to follow robust pricing procedures, clearly defined methodologies and price specifications during their market reporting and pricing sessions.

Fastmarkets has more than 150 years of specialist commodity expertise. As well as our thousands of metals prices, we have two benchmark lithium prices, both launched in 2017: lithium carbonate and lithium hydroxide. Fastmarkets also offers two market-leading spodumene prices.

Fastmarkets' mission is to meet the market's data requirements honestly and independently, acting with integrity and care to ensure that the trust and confidence placed in the reliability of our pricing methodologies is maintained.

We have reached a critical stage in the transition to a low-carbon future, but this ambition can create supply chains which are volatile and imbalanced, impacting the key electric vehicle (EV) and energy storage system (ESS) markets.

As you navigate this ever-changing landscape, you need prices and forecasts for key battery materials that you can rely on to reflect supply and demand conditions now and for the future.

Fastmarkets' energy events give you a front-row seat to one of the most dynamic and critical markets in today's economy as we make the strategic transition to a low-carbon economy.

The LME, CME and SGX have all launched or announced futures contracts that are cash settled against the Fastmarkets lithium indices. These allow market participants to lock in future prices, hedging as much or as little exposure as they wish. The ability to protect margins in this way enables supply chains to be more robust, while strengthening the growth of the battery materials market.
