Legendre Energie, a subsidiary of the French group Legendre, has signed a 25-year concession agreement with the Malian Ministry of Economy and Finance for the construction of a 50 MW solar park in Fana, in western Mali's Koulikoro region.

The power plant will be connected through the Fana (150 kV) substation located 1.3km from the project site. For the construction and operation of the park, Legendre Energie has set up the special purpose vehicle Fana Solar Power.

The investment in the project will reach approximately EUR50 million. According to Alouss?ni Sanou, minister of economy and finance of Mali, the implementation of the project will help to cope with the ever-increasing demand for electricity, by increasing the electricity production capacity of the interconnected national grid.

Mali had reached an installed PV power of 70 MW at the end of 2020, according to the International Renewable Energy Agency. Most of this capacity is represented by a 50 MW plant built by French independent power producer Akuo.
