

Manama energy storage solutions

Sustainable Energy Authority (SEA) president Dr. Abdul Hussain bin Ali Mirza held a virtual meeting yesterday with Energy Harbors Corporation (EHC) representatives. The SEA chief discussed matters of mutual interest in the increasingly important arena of energy storage tied to renewable energy investments.

The EHC representatives presented further information on their patented technologies, gave updates on several technological breakthroughs represented by the technologies within their respective areas of expertise, and discussed potential pilot project opportunities within the Kingdom.

SEA team members who also attended the meeting discussed other technical considerations, barriers to be overcome and potential synergies with the existing work of the authority. Dr. Mirza highlighted the aspects of the National Renewable Energy Action Plan and National Energy Efficiency Action Plan which may benefit from the technology's impacts.

He thanked EHC for their efforts towards developing novel and innovative solutions in sustainable energy and recommended engagement with other stakeholders within Bahrain, who would be interested in such solutions.

The SEA chief invited the teams to continue their discussions into key opportunities the EHC solutions present within the context of Bahrain's sustainable energy strategies, where large-scale energy storage is recognised as a vital component to ensuring the sustainability of future national, regional and global energy systems.

The shift towards a sustainable, non-oil economy presents exciting opportunities and challenges. From fostering effective energy management, executing seamless energy transition, building a competent workforce, and obtaining the required funding, Bahrain's path to net zero emissions opens up a world of possibilities. Come, explore, collaborate, and benefit from the Powerelec Bahrain!

Aligning with the country's Vision 2030 and the decarbonization plan of the Kingdom of Bahrain, Verifair Event Management takes pride in introducing its globally successful flagship Powerelec Events portfolio to Arabia. Taking a cue from the successful editions of Powerelec in the African Continent, the organizers aim to provide the renewable segment with a platform for the upcoming markets of Bahrain.

The event will create and provide the best platform for exhibitors and participants. Knowledge sharing sessions will further enhance your experience at this exclusive exhibition cum conference. The event is designed to connect the generation, transmission, distribution, clean tech, finance, manufacturers, power equipment and electrical suppliers, decision makers, policymakers and regulators under one roof!

Calling all renewable energy enthusiasts! The Bahrain Energy Show brings together the solar, wind, and

Manama energy storage solutions

nuclear power players under one roof. This exciting event is not just about showcasing the latest tech from companies big and small. It is also a hub for financiers and clean energy solution providers. This is nice for anyone interested in the future of sustainable energy in Bahrain.

Thermo Systems, under a design build contract with Tabreed Bahrain, designed, built, delivered, and commissioned a network of 13 new Allen Bradley PLC based Energy Transfer Stations serving the Reef Island development. Reef Island is a man made land structure on the North Shore of Manama, the capital of the Kingdom of Bahrain. Each building is served with chilled water through a network of underground pipes that are connected to the building's Energy Transfer Station, or ETS. The ETS regulates and meters the building's cooling supply
