## Minsk electricity consumption

RUE "Minskenergo" - the largest and most significant enterprise among the regional energy systems of the Republic of Belarus, which produces more 17% electricity and up 38% supplied thermal energy in the system of GPO "Belenergo", carries out complex activities for the production, transfer, distribution and sale of electrical and thermal ...

Total energy consumption (measured by total primary energy supply) in Belarus was 27.0 Mtoe in 2018, comparable with consumption in Norway and Hungary. The industry sector is the largest final energy consumer with a 36% share (7.3 Mtoe in 2018); it is also the greatest consumer of electricity and heat.

Energy in Belarus describes energy and electricity production, consumption and import in Belarus. Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. [1] Belarus is very dependent on Russia. [2]

MINSK, 31 October (BelTA) - In January-September 2023, electricity consumption in Belarus increased by 1.8 billion kilowatt-hours and amounted to 29.8 billion kilowatt-hours, Belarusian Energy Minister Viktor Karankevich said as he briefed Belarusian President Aleksandr Lukashenko on the completion of the project to build the Belarusian nuclear ...

Per capita energy consumption stands at 2.8 toe (2022), including around 3 700 kWh of electricity; such consumption levels are around half those for Russia. After a peak at 30 Mtoe in 2012, total energy consumption had a declining trend until 2020. It rebounded by nearly 9% in 2021, before declining again in 2022 (-4%) to 26 Mtoe. Graph ...

RUE "Minskenergo"; the largest and most significant enterprise among the regional energy systems of the Republic of Belarus, which produces more 17% electricity and up 38% supplied thermal energy in the system of GPO "Belenergo", carries out complex activities for the production, transfer, distribution and sale of electrical and thermal energy, aimed at ensuring reliable and uninterrupted power supply to consumers in the city of Minsk and the Minsk region.

RUE "Minskenergo" includes six combined heat and power plants (TPP-3, TPP-4, CHPP-5, TPP-2, Zhodino CHPP, Borisov CHPP), among which the most powerful is the Minsk CHPP-4; large regional boiler houses in the cities of Minsk, Molodechno, Borisov, mini-CHP in Vileyka, Molodechno, Soligorsk, Accidents.

Energy in Belarus describes energy and electricity production, consumption and import in Belarus. Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015,
