

Missing grid on solar inverter

Missing grid on solar inverter

Do you have a Power One / ABB Aurora Solar Inverter Missing Grid Message? If so your Aurora solar inverter isn't producing any power so don't ignore it & take action!

The Power One company that makes the Aurora inverter was bought out by another company called ABB, so there can be some confusion about who the manufacturer is.

The Power One / ABB Aurora Solar Inverters Missing Grid Message tells you that your inverter has not detected any electricity coming from the street. This can be caused by a number of different things, in this post, we'll investigate some of the common causes.

If you have checked the above and all seems okay, then you are going to need to contact a solar accredited electrician for further assistance. There are various issues it could be (switchboard, cables, or the inverter) and you will need the expertise of an electrician to diagnose and fix this.
