

## Mountable battery box

On racing vehicles, the battery can be relocated to serve as ballast, and can be positioned to balance the car for more traction, plus straighter burnouts and launches. Moving the battery out of the engine bay also protects it from extreme...

**Why Move Your Battery?** Maybe your battery doesn't take up a lot of room, but imagine all the performance mods you could put in that space instead! Imagine: a straighter inlet duct for your cold air, more room to route headers, a turbocharger, or even a bigger engine!

**What Do You Need?** Your battery's new home has to be just as secure as the one the factory provided... maybe even more secure, depending on the rules and regulations of your sanctioning body! Most relocation kits include a battery tray or box, along with enough battery cable to reach from one end of the vehicle to the other, plus terminals and mounting hardware. Exact contents vary by application, so use the Compare feature to find the right kit for your project.

**Top Brands** Get your battery relocation project done right with a kit from Summit Racing Equipment. You'll only find trusted brands here, like TurboStart, Taylor, BMR, and Mr. Gasket.
