

New york electric grid berne

New york electric grid berne

Our interactive map is updated every 5 minutes and provides regional power restoration information. You may also choose the outages by county option to see a list of estimated time of restorations, or ETRs, in your county. If you click on the arrow to the left of your county's name, you will see ETRs for the towns and villages within that county.

The ETRs are based on National Grid's latest damage analysis and reflect a general assessment of when the last customer in the specified area is expected to be returned to service. To check the specific ETR for your own property, log into your account. We make every effort to restore your service as quickly as possible.

This is a list of electricity-generating power stations in the U.S. state of New York, sorted by type and name. A more complete list can be found on the NYISO website in the planning data and reference docs section where an annual report called the Load and Capacity Data Report, or the "Gold Book" is listed. The list is located in Table III-2 of the report.

The following is a list of existing generation resources contained in the NYISO's 2018 Gold Book grouped by station location.
