

## North macedonia battery testing

Energy storage systems that have been tested and certified ensure reliable customers service, protect the natural environment and provide profits needed for business success. Selecting an experienced and recognized independent partner to certify energy storage systems and components demonstrates your corporate commitment to excellence.

We provide tailored comprehensive testing and certification in accordance with international standards, guidelines and quality regulations applicable to your individual needs. We conduct grid and photovoltaic installation simulation to examine conformity, functionality and productivity in various operating states.

We provide you project-specific services tailored to your particular needs to help you select suitable suppliers and reduce risk to maintain project quality. Our recognized certification and test mark are valuable indicators used to build confidence among financial and insurance partners. Our global team of experts and state-of-the-art local laboratories are capable of providing support at any time, anywhere in the world, from a single source.

We conduct standards-based testing from product development up to market approval. Our testing and certification increase your access to world markets. Our respected neutral test mark proves your quality commitment to boost consumer trust and gain competitive advantage.

Our services for the certification of energy storage systems and components, such as batteries, management systems, inverters and interfaces, have been designed according to international standards to assist various project partners including:

Manufacturers (ESS batteries, inverters, systems) Power plant owners and operators EPC contractors Network operators Planners, installers and developers Investors, lenders and insurance providers Government agencies Utilities

Our global network of experts is extensively experienced in the cross-industry inspection, testing and certification of energy storage systems. Our certification of stationary local battery energy storage systems is conducted according to these international standards:

Inverter testing for safety and grid conformity (according to EN 62109-1/2, VDE-AR N 4105, VDE 0124-100 and more) Individual testing (vibration, shock, climate, IP protection, EMC and electrical safety)

Furthermore, we support you throughout the entire production process, from design, development, manufacture and installation to testing and certification. We provide you comprehensive testing and certification for energy storage systems and components from a single source to lower cost and expedite

success.

Pre-assessment, such as documentation Technical support in research and development Transport test  
Certification or confirmation of conformity Assistance with product liability issues

On our website you can find T?V Rheinland tested product features, services, companies, systems and  
personnel certificate with certificate and customer website links by their individual ID Number

Nothing less than the future is at stake. Companies, institutions, public authorities and each and every one of  
us can play a positive role in shaping the path to tomorrow. We provide you with comprehensive support to  
ensure that you operate safely, sustainably and efficiently for many years to come.
