## Oslo off-grid energy storage

In today's connected world, keeping BESS systems online is critical to unlocking their full potential. At Pixii, we recognize that uninterrupted, secure connectivity is the cornerstone of maximizing ROI through our value stacking concept.

Our systems are designed to operate seamlessly in online environments while being safeguarded by advanced cybersecurity measures to protect against threats that could disrupt operations or compromise performance. From encrypted communication and secure access controls to regular vulnerability assessments and full GDPR compliance, our solutions safeguard both operational integrity and data privacy.

Our modular BESS are engineered with redundancy and resilience at its core. This modular topology allows us to isolate critical components and our connected gateway ensures live monitoring and robust recovery protocols. Pixii systems ensure continuous operation; even in the face of cyber threats or component failures. This reliability allows customers to confidently leverage energy storage systems for mission-critical applications, knowing their investment is secure and protected.

Pixii's rigorous testing process guarantees safety, reliability, and efficiency. From thermal management to compliance with industry standards, our systems are validated to perform in the most challenging conditions. This focus on quality ensures that your systems operate at peak performance, supporting uninterrupted online functionality and delivering optimal returns.

"As Chief Product Officer, my priority is ensuring every solution we deliver reflects Pixii's commitment to quality and innovation. Rigorous testing and continuous development are at the core of our approach, enabling us to provide energy storage that meet the highest standards of performance and reliability. With a proven install base exceeding 250 MW, I'm proud to say our systems are engineered to deliver lasting value and trusted reliability for even the most demanding applications"

Our comprehensive support and service offerings provide customers with the tools and expertise needed to maintain secure, high-performance systems. From extended warranties and predictive maintenance to global technical support and Service Level Agreements (SLAs), Pixii ensures your BESS remains a reliable asset with predictable operating costs.

Pixii brings proven experience in BESS use cases with a track record of more than 250MW installed energy storage world wide. We have a strong network of global partnerships and our in-depth understanding of the energy storage landscape, and know-how to tap into available local and regional income generating battery functions. By aligning advanced technology with tailored strategies, we ensure an optimized ROI and ultimately a BESS that pays for itself. With Pixii, you gain a partner dedicated to unlocking the full potential of your energy storage investment.

# Oslo off-grid energy storage

Norway is recognized for its high standards in engineering and innovation, and Pixii embodies this tradition of excellence. Our Norwegian heritage ensures that our products are built to withstand the most demanding conditions, with a relentless focus on safety, security, and quality.

Pixii's modular technology enables unparalleled flexibility both on the hardware and the software side, to deliver energy storage systems built for the future. Designed with redundancy and resilience at their core, our solutions ensure uninterrupted performance and adapt to evolving needs. We are a solid company backed by a strong ownership and have a proven track record. Pixii provides reliable systems that maximize ROI while maintaining long-term operational efficiency and security.
