The National Energy Commission of the Dominican Republic (CNE) has announced the granting of the definitive concession to three photovoltaic projects totaling 148 MW.

In the Dominican Republic, the National Energy Commission (CNE) has granted the definitive concession to three contracts for the installation of solar parks located in different regions of the country with a total combined capacity of 148 MW.

The fact that three definitive concessions to as many plants have been granted on the same day has been judged in a statement by the CNE as "a historic milestone";

The executive director of the CNE, Edward Veras, signed the concessions for the following companies: LCV Ecoener Solares Dominicana, to develop the Planta Solar Photovoltaica Payita 1 project; Cotoper? Solar FV, for the Cotoper? Solar I Photovoltaic Park; and Renewable Energy World Dominicus (R.E.W.D.), for the Parque Solar R.E.W.D. project.

LCV Ecoener Solares Dominicana's Planta Solar Photovoltaica Payita 1 will have a nominal capacity of 50 MW and will be located in the Payita area of the Nagua municipality in the country's northeastern Mar?a Trinidad S?nchez province.

Renewable Energy World Dominicus" Parque Solar R.E.W.D., which will also have a nominal capacity of 50 MW, will be developed in the municipality of Villa Hermosa, in the province of La Romana, east of the capital city of Santo Domingo.

The 48.06 MW Cotoper? Solar I Photovoltaic Park, built by Cotoper? Solar FV, will be located in the municipality of Guaymate, also in the province of La Romana.

environment, announced yesterday a plan for installing solar panels in 180,000 homes and small businesses throughout the country to generate 600 megawatts of electricity in three years.

The plan, prepared in coordination with the Ministry of Energy and Mines, foresees the installation of 600 megawatts of solar energy, producing 900 million kilowatts/hour of clean electricity annually.

The plan's financing would be mixed: US\$350 million would be provided by the Government from the electricity subsidy, and US\$380 million would come from the cooperatives, for a total of US\$730 million.
