

# Panel mount digital multimeter

## Panel mount digital multimeter

ProSense digital panel meters provide a simple, low-cost digital display solution for a variety of process signals, such as temperature, load cell, voltage, current, pulse, frequency, and others. These versatile panel meters are IP65-rated and are available in 1/32 and 1/8 DIN sizes with easily configured, bright LED displays.

The Industry Leading PLATINUM Series family of microprocessor-based, Universal Input, digital panel meters offer unparalleled flexibility in process measurement.

The DP6000 Series process meter has options for multiple relays and 4-20mA output. Modular USB, RS-232, RS-485 serial communications options and relays. NEMA 4X front.

The OMEGA(TM) iSeries is a family of microprocessor-based instruments offered in three true DIN sizes with NEMA 4 (IP65) rated front bezels, and Serial Communications.
