

Pecron portable power station e600lfp

Pecron portable power station e600lfp

Featuring 3 x pure sine wave AC 1200W outlets, 1x12V Car; 2x12V DC5525; 2xUSB-C; 2xUSB-A; 1xWireless Charging Pad, E600 LFP can power most of appliances under 1200W.

The E600 LFP features a long-lasting LiFePO4 battery (3500+ life cycle to 80%) and a built-in BMS that protects your equipment from over-load, over-current, short-circuit, over-temperature, etc.

The E600LFP has three charging methods, including AC (home) charging, DC (vehicle) charging, and PV (solar) charging. E600 LFP adopts a MPPT charge controller that supports a maximum 300W solar input, allowing you to fully recharge within 3.5 hours.

All PECRON products provide 12 month warranty, free replacement or repair on any damaged (non man-made damage) within 12 month. If there is any problem for the products usage, please contact us and return the item to our warehouse, we will fix it and return back to you.

Around this time last year, I went hands-on with the Pecron E2000LFP, a high capacity portable power station with 2000W of power on tap and a massive 1920Wh LiFePO4 battery inside. While the value of having a battery power station for home use is proven - especially during extreme weather when blackouts are an increasingly reality - a power station the size of the E2000LFP isn't for everyone. However, the company also offers a much more portable and affordable solution in the Pecron E600LFP portable power station.
