Photovoltaic energy storage system 180 kWh

Eaton says its new xStorage commercial and industrial battery energy storage system (BESS) offers storage capacities ranging from 250 kWh to 1,000 kWh, using lithium iron phosphate batteries with self-contained liquid cooling.

"The BESS transforms facilities from loads on the grid into intelligent energy assets by accumulating energy from onsite generation sources and discharging the energy strategically to make the biggest impact," the company said. "The solution enables customers to tap into stored energy when utility rates are highest, if an outage is detected, or when energy markets are favorable for selling excess energy back onto the grid."

Your personal data will only be disclosed or otherwise transmitted to third parties for the purposes of spam filtering or if this is necessary for technical maintenance of the website.
