Port moresby school energy storage

TOTAL ENERGIES has donated a Spectra 550Kva Genset and Information and Communication Technology equipment to Port Moresby Technical College to support the school from continuous power outage last Friday at the school campus in Port Moresby.

TEP PNG Public Affairs Manager, Mr Richard Kassman said contributing to this school is an important decision made to the history and success of this college for many years.

"The commitment was made under the Memorandum of Understanding (MOU) between TEP PNG, the Department of Education in addressing inconsistencies in power supply along with supplementary education equipment, to allow for a conducive workspace for all students.

He said Papua LNG Project is pleased to offer support through items such as the GENSET and ICT equipment, which only stands to add value to the merit of a renowned institution such as POM Tech, in promoting the quality of education.

The Project remains committed to becoming a significant contributor to the country's workforce development, in line with one of its three major pillars of its National Content Plan: Promoting the employment and training of PNG citizens.

Head of Societal Development for Total Energies Exploration and Production (EP), Ms. Claudine Chavee said being able to contribute to a vocational institute like POM tech was great.

Ms. Chavee said supporting Education is the key topics in social performance, Papua LNG looking at the footprint of the projects is important in making sure we respect culture and not causing harm to develop the areas.

She added that TEP PNG is going to bring in resources into the country to the government and it will further develop the nation and skilled workers are the basis on development of any nation hence contributing to this schools are very important to the company.

The World Bank has approved a project by Papua New Guinea-based energy company PNG Power (PPL) to support improvements to the company's operational and financial performance.

Set to be implemented over the next five years, the PNG Energy Utility Performance and Reliability Improvement Project (EUPRIP) will help establish a strong foundation for PPL to become financially

sustainable and catalyse private investments in the energy sector.

The EUPRIP will also help in reducing power generation costs and transitioning to renewable energy by preparing and implementing a Least Cost Power Development Plan for the company.
