

Powin energy locations

Powin energy locations

A brighter tomorrow starts with clean and abundant energy for all. We've made it our mission to lead the sustainable energy transformation through simple, safe, and scalable energy storage solutions we can all count on.

Since 2010, Powin has been working to mitigate the economic and environmental impacts of climate change by revolutionizing the way energy is generated, transmitted, and distributed for utilities, IPPs, and energy consumers worldwide. Now, we are an industry leader, with over 17,000 MWh of energy storage systems that have been deployed or under construction worldwide.

Our efforts to build a robust, reliable supply chain that we rigorously manage have led to one result: the highest-value, cost-competitive energy storage solutions for utility, commercial and industrial, and microgrid applications.

We're on a mission to be the most trusted energy storage provider, optimizing performance while de-risking projects by delivering fully integrated systems, advanced software, and comprehensive services.

As a leading US and global energy storage provider, we have deployed gigawatt-hours of systems around the world, including projects with more than a decade of 98.1% fleetwide availability.

Innovation is at the heart of everything we do, driving continuous development of cutting-edge technology that pushes the bounds of increased efficiency, reduced costs, and optimized energy management.

Our bottom-up design allows us to monitor activity in each individual battery cell for predictive diagnostics and proactive maintenance. We share this data with you for in-depth system behavior analysis.

Working together is in our DNA. We're firmly committed to accommodating your specific needs, starting with a contracting process that's straightforward and flexible.

Our leadership team is an essential part of our commitment to accelerate the clean energy revolution. Their decades of diverse experience, professionalism, and dedication to innovation have helped make Powin the leading, industry-defining company that it is.

Powin has attracted a diverse group of mission-driven experts to guide our continued leadership of the energy storage industry through this critical period of grid transformation.

Purpose-built products need partners who are driven by that same objective. We are proud to be supported by investors who share our mission of widespread grid modernization.

Powin energy locations

We're all about building flexible, forward-looking systems -- including a diverse, inclusive workforce where Powineers are supported to innovate the energy future we need.
