Improving social and territorial infrastructure and services, including social protection and welfare systems, the inclusion of disadvantaged groups; supporting employment and skills development; creating high-quality, stable jobs.

Improving the resilience, accessibility and quality of health and long-term care, including measures to advance their digitalisation; increasing the effectiveness of public administration systems.

The map exclusively serves information purposes and is not an exhaustive database of projects supported by the Recovery and Resilience Facility. It does not reflect the distribution of the projects funded by the Recovery and Resilience Facility across the European Union, nor across different geographical areas or sectors within EU Member States. The RRF funding amounts shown for measures are based on the initial cost estimates included in the recovery and resilience plans.

Furthermore, the projects showcased are without prejudice to any future assessment by the Commission in the context of verifying the satisfactory fulfilment of milestones and targets under Regulation (EU) 2021/241 establishing the Recovery and Resilience Facility.

The country snapshot illustrates some of the most iconic and impactful projects included in the Latvian Recovery and Resilience Plan that will bring positive change for EU citizens, businesses and the EU at large.

The reforms and investments in Latvia's plan are helping it to become more sustainable, resilient and better prepared for the challenges and opportunities of the green and digital transition. Following Council approval of Latvia's plan on 13 July 2021, Latvia's recovery and resilience plan was updated on 8 December 2023 also to introduce a REPowerEU chapter.

All measures included in the modified plan have to be implemented within a tight time frame, as the Regulation establishing the Recovery and Resilience Facility requires all milestones and targets within the national plans to be completed by August 2026.

The REPowerEU grant allocation amounts to EUR124 million. Moreover, Latvia has requested to transfer EUR 10.9 million from the Brexit Adjustment Reserve (BAR) to finance investments and reforms of the chapter, for a total of EUR135 million.
