Riyadh energy storage systems

Saudi Water Partnership Company (SWPC) issued a notification to submit an Expression of Interest (EOI) for performing the reliability assessment of Power and Water projects. …

With the increasing world energy shift towards renewable energy, we differ from others by providing a very efficient technology in affordable and more valuable implementation cost.

Get our latest news, offers and technical references from this section. We post in here some market watch and technical information. We make all of our materials available for read and download.

National Grid Saudi Arabia, a wholly-owned subsidiary of Saudi Electricity Company (SEC), has tendered contracts for the construction of five battery energy storage systems with a total combined capacity of 2,500MW across Saudi Arabia.

The planned facilities, each with a capacity of 500MW or roughly 2,000 megawatt-hours, are located in or within the proximity of the following key cities and loadcentres:

MEED understands that the deadline for engineering, procurement and construction (EPC) companies to submit their proposals for some of these contracts is 11 September.

They are envisaged to replace part load operation of existing power plants by charging and discharging electricity according to the system load variations and primary and secondary reserves, among other potential applications.
