## Sanaa solar energy jobs

This tool maps a broad and representative selection of occupations critical to building a high-quality solar industry. Not every solar job is listed. And not every job listed devotes the majority of its time to solar work. Check out the "more jobs" tab to see jobs not listed on this map.

The expanding solar industry offers careers in the residential, commercial, and utility-scale sectors for people of all levels of education and experience; this map explores 44. An ambitious worker could progress within any of these solar-related occupations, or seek the skills and credentials to advance between them. Click any dot to find out more.

Equipment Operators on solar installation sites are responsible for operating various types of construction equipment that are imperative to all aspects of a solar job, regardless of the size of the project.

Carpenters with Solar Expertise are extremely important for maintaining structural and support for utility-scale, commercial and residential solar projects. By using materials including wood, metal, and concrete, carpenters ensure that solar installations are secure and meet quality standards.

Solar Construction Workers carry out physical labor tasks at utility-scale, commercial, and residential solar projects in compliance with system design schematics.

IT specialists support clean energy's cutting-edge digital tools for a wide range of solar industry applications, including PV system design and monitoring; solar investment, finance, and sales; project permitting; and service logistics.

Entry-level installers assemble and mount photovoltaic systems on roofs or other structures in compliance with system design schematics for residential, commercial, and utility-scale solar projects.

Solar Site Supervisors lead teams of PV Installers at a worksite. They motivate and coordinate, keep crews focused and on schedule, verify safety procedures and equipment, and provide quality assurance.

Solar Project Managers coordinate all of the workers and materials involved in a solar installation, managing time and budgets, and translating between engineers, system designers, and installers in the field.

Solar Fleet Managers identify, cultivate, and manage third-party vendors to service residential or commercial solar installations. They interact with multiple business interests to ensure service level agreements are met, and they oversee logistics coordination for existing and new solar installation equipment.

Solar Instructors transmit the industry's fundamental principles and best practices--in science, technology,
