Small wind turbine manufacturers uk

Designed and manufactured in the UK, our small wind turbines include the best selling LE-300 horizontal wind turbine (fully marinised) and the more powerful horizontal turbine, the LE-600.

Suitable for harsh locations where a horizontal wind turbine simply couldn't survive prolonged periods of storm force wind, there's the robust and compact vertical turbines, the LE-v50 and LE-v150. Each of these have their Extreme versions, the LE-v50 Extreme and LE-v150 Extreme for remote power generation in some of the harshest places on Earth. There is now a further enhanced version of the LE-v150 Extreme, the LE-v150 Storm, designed for winds up to 45m/s (100mph).

To protect the batteries from over-charging, a charge controller is configured to "diversion" mode and operates as an "overflow" for the battery bank, bleeding excess energy to a dump load when the batteries are full. See the range of "Wind Turbine Controllers" below. If you are unsure which one is best for your project do get in touch.

Please tell us as much as you can about your use case. We understand that you may not be able to answer all questions. We will call you to discuss your requirements in any case.

Fitting solar panels to your caravan roof is an excellent step towards more energy-efficient holiday trips. Perhaps you've found the... [Continue Reading...](#)

Excellent customer service from friendly, knowledgeable staff who provided easy to understand technical advice when I had a problem with my Solar iBoost. Replacement provided without fuss. One of the best companies I have dealt with.

Purchased both the iboost+ and the Ibuddy, They work extremely well together and do exactly what they should. They are so easy to use. Have lots of free hot water. Needed a little support when setting up and Start was great very understanding and knowledgeable. A super experience.

## Small wind turbine manufacturers uk

This is a great company, very fair pricing exceptional fast friendly Service and knowledgeable. I really like this company and the website is great to use. I've had the 910 on the great Blasket Island on the most western part of Ireland for the past 10 years and only need a few new parts now due to my own neglect. Bargen The machine is 18 years old and still functions like new Looks good too. Thanks Marlec Team.

Though there were problems with my email provider the Marlec team, particularly Julie, were helpful and committed to sort out the problems and get my new unit to me.
