Solar energy for the environment bandar seri begawan

Guidebook for Solar PV Rooftop and Net-metering Programme serves as a reference or guidance for the public who wish to explore the opportunities in producing their own Renewable Energy on their own. The Guidebook entails general information on how to start planning for your solar PV system, how to enroll in the Net-metering Programme, estimated cost of Solar PV system, etc. The Guidebook is a live document, and will be constantly updated and revised by the Ministry based on the latest information and requests from the Public (if any).

BANDAR SERI BEGAWAN - Brunei Shell Petroleum (BSP) will soon convert its headquarters in Seria from gas to solar power. BSP Managing Director Dr Ceri Powell said the company is investing millions to build a new solar park close to its headquarters, which currently houses 1,400 staff.

"[This is] land that we've used for housing before. The houses have been demolished, so we have perfect flat land for building solar park," she said on the sidelines of a recent youth dialogue on climate change.

The vast majority of the country's electricity is generated by gas-powered plants, which make up 50 percent of greenhouse gas emissions. The oil and gas industry contributes around 35 percent of emissions.

The Ministry of Energy, Manpower and Industry (MEMI) also recently called for proposals from interested parties to build and operate a 30 MW solar power plant in Kampung Sungai Akar.

"BSP is of course about mature oil and gas production, but it is also about finding new hydrocarbons. I'm very excited to say even in the last three months, we've found new oil and gas offshore in Brunei." "We won't say precisely where... but new oil and gas is offshore in Brunei which will add to the future oil and gas resources for the nation."

ASEAN Centre for Energy (ACE) is an intergovernmental organisation within ASEAN structure that represents the 10 ASEAN Member States' (AMS) interests in the energy sector.

BANDAR SERI BEGAWAN - Brunei Shell Petroleum (BSP) has begun construction of its 3.3 MWp utility-scale solar photovoltaic (PV) park on Friday, which is set to reduce the greenhouse gas emissions of its headquarters in Seria. A groundbreaking ceremony was held at the G11 site -- a former BSP housing area -- at Seria's Jalan Tengah, BSP said in a statement.

BANDAR SERI BEGAWAN, March 21 (Borneo Bulletin/ANN): Brunei's Department of Energy at the Prime Minister's Office welcomes the installation of solar panels at residential houses and buildings to facilitate and encourage wider use of solar energy said Minister of Development Dato Seri Setia Awang

Muhammad Juanda Abdul Rashid during the 19th Legislative Council session.

Awang Muhammad said there are about 20 companies supplying solar panels as well as offering installation services. At the moment, 40 private residences have been installed with solar energy, he said.

The minister also noted that the Department of Electrical Services has provided temporary solar facilities for around 90 houses in remote areas, while the programme to provide more supply of electricity in rural areas is being carried out.

"Under the 11th National Development Plan, projects in further improving electricity supply networks in Sukang and Melilas is expected to be completed by end of this year," he said. - Borneo Bulletin/ANN
