Solar energy jobs seoul

Mott MacDonald is a dynamic and innovative engineering, management and development consultancy working with high profile clients in Korea, across Asia and globally. Our purpose is to improve society by considering social outcomes in all we do, relentlessly focusing on excellence and digital innovation, transforming our clients' businesses, our communities and employee opportunities. We are looking for passionate interns to join our internship program for our Energy sector in Seoul.

This is your opportunity to gain valuable experience in a consultancy that will provide you with a platform to tap into expertise across the globe and give you the hands-on experience to make a difference in the communities that we live and work in. The programme will provide you with invaluable networking, learning and development opportunities.

Our Internship program is a 10-12 week program. It is focused on giving you exposure to our industry and the projects we work on which impact our world. Every day will see you actively engaged with contributing to the success of our global consultancy. You will be supporting with the planning and delivery of projects, engaging with clients, developing your skills, assisting with bids and proposals and working as part of an experienced team.

We have a supportive and collaborative culture which values equality and diversity, and we take proactive steps to create an inclusive workplace. We value the diversity of our staff and are committed to creating an inclusive work culture where everyone can bring their full selves to work.

This is a great opportunity to join a growing consultancy that is pushing ahead in the local market. If you are looking for an opportunity to work in a fast-growing business with an organisation that is shaping the communities in which we live, then join our world class consultancy.

We put equality, diversity and inclusion at the heart of our business, seeking to promote fair employment procedures and practices to ensure equal opportunities for all. We encourage individual expression in our workplace and are committed to creating an inclusive environment where everyone feels they have the opportunity to contribute.

At Mott MacDonald, we believe it makes business sense for you and your manager to choose how you can work most effectively to meet your client, team and personal commitments. We embrace agility, flexibility and trust.

Seoul, the bustling capital city of South Korea, is taking a bold step forward in its commitment to sustainability by embarking on a massive solar energy project. The city government has recently announced that all public buildings in Seoul, including schools, hospitals, and offices, will be fitted with solar panels.

Solar energy jobs seoul

Moreover, the project aims to install solar panels on over one million residential buildings in the city. This ambitious project will not only produce clean energy but also help reduce the city's carbon footprint and create jobs in the renewable energy sector.
