Solar energy policy solomon islands

Solomon Islands has the potential to increase electricity access and use through renewable energy resources and technologies to 100% by 2050. However, increasing the use of these renewable energy resources presents challenges.

The Renewable Energy Strategy and Investment Plan (RE-SIP) lays out the Solomon Island's renewable energy targets and policy outcome and strategies and financial requirements for achieving a sustainable energy future for all Solomon Islanders.

The Solomon Islands National Energy Policy : 2019 - 2030 contains strategic direction and key priorities for the development of the energy sector in the next 10 years which will enable a transition to sustainable economic development in the country. Authors: Ministry of Mines, Energy and Rural Electrification. Publication Category:

As the nation steps into a brighter tomorrow, the echoes of this project will resound in the efforts towards the renewable energy policy, highlighting the vital role of community participation and the inclusion of marginalized voices in shaping a more equitable and sustainable future for Solomon Islanders.
