The vital role in which the sun plays in life on Earth has been celebrated since ancient times. Egyptians in Africa were the first people known to use solar energy on a large scale to heat their homes, designating them in a way that could store up the sun's heat during the day and release it at night. Fast forward to today, societies around the world have developed innovative technologies that allow us to turn the sun's energy into electricity that powers heating and cooling systems, transportation, lighting, and ventilation, just to name a few.
