

Solar incentives kosovo

The EIB is providing EUR33 million for the construction of one of Kosovo's largest solar photovoltaic plants. In line with the EU Global Gateway initiative, the project will also benefit from a EUR29 million loan from the KfW Development Bank and a EUR32 million EU grant channelled through the Western Balkans Investment Framework. The new ...

In collaboration with local experts and data scientists, USAID uses various assessments to identify opportunities for businesses across Kosovo to install rooftop solar panels. The first assessment is an aerial solar assessment, which uses a combination of drone footage and spatial analysis to determine how much clean, renewable electricity each ...

Kosovo's Ministry of Economy has opened a funding call aimed at household consumers looking to install a solar system for heating sanitary water. The funding opportunity will subsidize 40% of...

Solar and wind power plus energy storage will at the same time reduce the cost of energy long term. UNDP's "Support for Sustainable Prizren - Initiating Urban NAMAs (Nationally Appropriate...

Kosovo is making it more attractive to invest in renewable energies - with funding programmes for private individuals and companies. Modern and efficient heating technology, renewable energy expansion and building insulation - this is Kosovo's formula to combat energy shortages.

Kosovo's green agenda goes beyond promoting climate-friendly practices; it is a plan that aims to grow the economy, strengthen energy security, mitigate climate change, and create local jobs in Kosovo.

USAID supports the Government's efforts to implement this green agenda in multiple ways. First, USAID engages with institutions and businesses to promote renewable energy through policy reforms and events. Most recently, USAID co-hosted the Kosovo Solar Forum. Held on July 21st and 22nd, participants discussed investments into the "prosumer" (an entity that both produces and consumes electricity), self-consumption markets for small-scale solar power, and the upcoming solar auction, an open procurement process for large-scale solar projects in Kosovo.

Through innovative initiatives like the rooftop solar assessment, USAID is helping to increase awareness of

Solar incentives kosovo

and build the enabling environment for climate-friendly, sustainable electricity generation across Kosovo.

Household consumers in Kosovo can now apply for a subsidy to install a solar system for heating sanitary water. Applications to the first of two stages are open until August 31.

The application process for the subsidy is divided into two phases. Applications to the first phase are open now, until August 31. The second phase will then open on October 31.
