Solar panel cleaning cost

Solar panel cleaning cost

Service Professionals: create a reusable estimating app that is 100% customized to your business. Start with a template or build your own (free; Account sign up required):

In September 2024 the estimated cost to Clean Solar Panels starts at $123 - $154 per panel. Use our Cost Estimate Calculator for cost estimate examples customized to the location, size and options of your project.

Homewyse uses the Unit Cost Method for up-to-date example estimates and custom estimates created with Homewyse Lists. The Unit Cost Method promotes clear communication, sets realistic expectations between the customer and service professional - and results in mutual trust, fair pricing and high customer satisfaction.

This example estimate is for BASIC work performed in readily serviceable conditions by qualified professionals, using popular, IN STOCK products, materials and supplies available at home improvement retailers. Your actual costs will vary due to the unique conditions, requirements, labor options and material choices of your project. Work not mentioned on this page, work with schedule difficulty, work during periods of local labor shortages, and work using master craftsman, premium materials, custom built products, project supervision may result in HIGHER COSTS!

This example estimate is for educational and illustrative purposes - it is NOT a substitute for written quotes from trade professionals. Homewyse strongly recommends that you contact reputable professionals for itemized assessments of work required and costs for your project - before making any decisions or commitments.

This infographic highlights some of the decisions and job specific issues that could impact the actual cost of Solar Panel Cleaning - if applicable to your job.

Solar panel cleaning costs $10 to $20 per panel or $150 to $500 total on average, with most homeowners spending about $325. Solar panel cleaning costs depend on the location, job size, complexity, cleaning method, and whether the service includes an inspection. Most solar panel repairs cost $250 to $1,500.

Panel size, number, & type - As expected, cleaning larger-scale solar panel systems takes longer and costs more. However, professionals may offer a discount on the price per panel for larger jobs. The panel type and manufacturer warranty stipulations also affect the cleaning methods and products used.

Roof height & steepness - Roof height and steepness impact whether the job requires extra equipment and safety measures, which may increase the cost. However, panels at a steeper tilt often require less cleaning since dirt sheds off more easily.

Solar panel cleaning cost

Contracts & warranties - Many solar companies include an annual inspection and annual or bi-annual cleaning service when you hire them to install the panels.

Solar panel repair costs $250 to $1,500 on average, but prices range from as little as $20 for a tiny crack repair to as high as $3,000 to replace a broken inverter. Keep in mind if the repairs are not done during the cleaning appointment, most repair professionals have minimum job fees.
