## Solar panel companies kent

As solar panel installation experts and renewable energy specialists in Kent, our mission is to reduce carbon emissions, cut energy costs and protect the environment.

Providing domestic and commercial services across the South East of England and beyond, we promote sustainability, focussing largely on solar panel installs, solar panel maintenance and solar storage systems to suit your needs. Every property is different, but we'll help you to utilise the power of the sun in the most cost-effective and efficient way possible.

In line with our sustainable ethos, we also offer charging solutions for electric or hybrid vehicles as well as a wide range of electrical services. Contact us today for more information. We're always happy to help.

As solar PV installers in Kent, we expertly install photovoltaic (PV) panels according to property size and energy demands. These use the sun's energy to generate an DC current which is then converted into a usable AC current compatible with powering your home. Our team will inspect your roof, determine where the panels should be placed and advise on how many you'll need.

Excess energy produced by your solar panels can be stored in a solar battery system for use after dark or during a power outage. Alternatively, it can also be sold back to the National Grid, helping you to earn a bit of extra money. Talk to us today about solar batteries, which can be installed with your solar panels or added to an existing system.

As well as installing the right number of panels for your domestic or commercial property, we also provide solar panel maintenance. While solar panels are notoriously low-maintenance, we offer continuous support to ensure your system works properly and remains efficient. As a rule, solar panels should be kept free from obstruction and be kept as clean as possible.

We're passionate about solar energy but our services don't stop there. As specialist EV installers, we also offer a wide range of electric vehicle charging solutions. We're an approved partner and installer of Zappi and Pod Point electric vehicle charging equipment and can install stand-alone EV home and workplace charge points.

Here at SESE, we provide an array of electrical services for your peace of mind. From full or part rewiring and fuse board changes to smart heating and lighting control systems, we've got you covered. Speak to us about all your electrical needs including electrics for extensions and loft conversions or burglar alarm fittings.

## Solar panel companies kent

subject to status. The rate offered is always provisional and will depend upon your personal circumstances, the loan amount and term.

Came across this company via checkatrade and they've been nothing but professional from the moment they first contacted me. I would highly recommend this company. hope be to be able to continue to use them in the future.

I requested a quote from SESE after having a quote done by another company. SESE came in at a much more competitive and realistic price to meet my requirements and expectations, and from start to finish, Gemma, was absolutely excellent. She took the time to explain it all to me and her responses were speedy and clear.

The communication from SESE has been excellent, they have obviously streamlined the service over time. It was so quick, hassle free and easy from start to finish. The workmen were all very polite and punctual, as well as clean and tidy and open to any questions we had. The install was seamless.
