

Solar panel wholesale website

Solar panel wholesale website

If you are looking for a place to buy wholesale solar panels, you've found it. A1SolarStore offers PV modules from all over the world for competitive prices and with fast delivery. Let us tell you a little about the panels that we offer, how we deliver them and what kind of solar panel you might need.

There are three most popular types of solar panels on the market: monocrystalline, polycrystalline and thin-film. Monocrystalline or mono panels are the most reliable and efficient type, polycrystalline or poly panels are slightly cheaper, but less productive. Thin-film panels or flexible panels are special in a way that they are very light and bend well.

Monocrystalline panels are easy to distinguish by the black color of the cells. Their efficiency today varies from 16 to 22%, which means that mono solar cells convert into direct current from 16% to 22% of the sunlight that they receive. That's the most popular type of panels -- in fact, most top manufacturers don't even sell anything else.

Polycrystalline panels are usually blue in color. They were dominant on the market 10-20 years ago, but today they slowly fade away. The reason for this is their low efficiency: 13%-17%. Manufacturing process is cheaper than it is with mono panels, but lower cost doesn't quite justify low production levels. However, some brands still like to experiment with them and include them in their product line -- for example, Canadian Solar offers both wholesale mono and polycrystalline solar panels.

Thin-film panels are a special thing. They are cheap and very easy to install, because they bend well and their weight is small. However, they are inefficient and their lifespan is considerably shorter than the lifetime of rigid panels. Usually, a flexible panel lasts for 10-15 years. They are quite popular in mobile installations, such as RV and boat systems. Because of their low price, wholesale lightweight solar panels can be a good choice for large projects, especially when the configurations of a surface make it difficult to install rigid modules.

While China is an undeniable leader on the solar market, the companies from all over the world offer competitive solar products and we keep the best of them in stock. So what are the most popular and reliable solar panels wholesale suppliers? Let's take a quick look at a few brands.

Panasonic is one the oldest and most well-known brands in electronics. The Japanese company gained a great reputation over the years. Photovoltaic panels from Panasonic are very high quality, packed with innovations and are known for outstanding performance at high temperatures.

The Canadian brand was founded by Chinese scientist Dr. Shawn Qu. The panels that the company offers for sale aren't too expensive, but they are quite powerful and perform well in low-light conditions, such as cloudy

days, winter and fall.

This Chinese company competes in the Top-5 world's largest solar brands. The panels from Trina Solar hold several world records for being the most efficient and productive. At the same time, the Chinese brand manages to keep the prices relatively low.

Norwegian brand REC is known primarily for its premium-class residential PV modules. However, it doesn't limit itself to this: the product line is wide enough that you can use wholesale REC solar panels for building a strong commercial system, small or large. REC products are known for high quality, great warranties and innovations.

The Chinese brand aims to be the largest solar brand in the world. JA Solar offers cheap, efficient, high output PV modules for all kinds of applications, but especially solar farms. For instance, JA Solar wholesale 500 Watt solar panels are a great choice for systems of a large scope. They feature simple design, low price and high output.

Solar panels can be very different in terms of cost, and several factors impact the final price, such as wattage, brand, type of panel, warranties, etc. Whatever brand you pick, its solar panel wholesale price is lower than retail, so you end up saving a lot. Notice that at A1SolarSolar when it comes to the wholesale price of a solar panel, we show the cost per watt rather than per pallet or per panel.
