

Solar power honiara

Solar power honiara

We are excited to share that we have commenced the construction of 220kW solar plant at Solomon Power head office rooftop. This is funded by the World Bank and is being constructed by JGH GROUP and the subcontractor Superfly Limited. This project will contribute towards Solomon Islands plan for 100% renewable energy in Honiara by 2030.

Our customer care team is available to assist you, Monday to Saturday, 8:00am – 4:30pm. 24/7 customer call-center support for after and during working hours.

SUNPOWER in Honiara, Solomon Islands provides products and education on sustainable solar power. We serve Solomon Islanders seeking a clean and sustainable source of energy for their homes. Our customers share the common goal of reducing the expensive cost of electricity.

We work with government agencies to support solar projects, as well as non-government organisations operating with funding for development projects. We are proud members of the Solomon Islands Chamber of Commerce.

The future looks bright for solar power in the Solomon Islands, particularly in regard to the positive impact it can have in rural areas. Replacing kerosene lamps, candles and generators with a clean energy source and the ability to recharge communication devices such as phones, tablets, and laptops is now very achievable at an affordable cost for households, businesses, schools, and churches.
