Solaredge battery problems

Troubleshoot SolarEdge Home Battery. Your SolarEdge Home Battery helps you optimize your energy usage by using stored solar energy when electricity rates are high, and in the event of a power interruption. The SolarEdge Home Battery is designed to automatically switch to backup during an outage for partial or full home backup - depending on ...

13. Battery below min SOE The Battery has entered power saving mode because it has reached its minimum SOE level and cannot be charged. The following alerts may have caused the battery to reach minimum SOE. Check if they are open and if so, try to resolve them: 1. Inverter is not producing energy 2. Battery tripped

The battery seems self-discharge to 97-98% by the time the sun comes up, then the solar charges it back to 100%. But evening demand that used to be satisfied by battery discharge is now coming from the grid. I contacted SolarEdge support who said that apparently I ended up on a TOU profile which somehow stopped battery discharge in the winter ...

SolarEdge Home Battery FAQs Q1: When will the SolarEdge Home Battery be available? A: The battery can be ordered immediately from your local SolarEdge distributor. We invite you to discuss the price with the distributor and plan possible future delivery for your projects. Q2: For new installations, is the DC combiner always required?

Hello my battery suddenly stopped discharging last night. I was hoping it would sort it self out by morning but today it's sending straight to grid rather than charging the battery so it's as if the battery doesn't exist. Any idea how to fix this or is it busted?
