

Sonnen batteriee hybrid

Sonnen batteriee hybrid

The sonnenBatterie hybrid 9.53 isn't able to be bought directly from sonnen. However, it is available to purchase through accredited installers across Australia. As the sonnenBatterie hybrid 9.53 is the premium battery on the market, it comes at a premium price. The below pricing is taken from Solar Choice's database of installers and is an indicative final price for a basic installation.

Sonnen provides a mobile app which is available for android and iPhone. The app enables the user to check their system status, history, forecast and control white goods if utilising radio controlled sonnenSmart-Plugs.

Showing 9 of 9 Reviews 17th October 2024 Michelle - system 5.00 Have had the battery installed for a couple of days and even though we are experiencing thunderstorms and a lot of cloud cover I can still notice a difference. Am looking forward to seeing what this system can now do once the sun comes out again :)

Inverter failed after 12 months. It has been down for three years and Sonnen are refusing to support the Warranty. Sonnen claim their installer installed the system incorrectly. They only made this statement after 3 years of failing to fix the system. Now the installation company has ceased trading and Sonnen have wiped their hands of the problem. They won't even respond to emails or phone calls now. I have reported them to the ACCC, and started proceedings through Fair Trade.
