

Sonnen batteries 9 53

The sonnenBatterie, a cutting-edge storage solution, has earned its stripes in numerous households, delivering reliable performance daily. Paired with a PV system, it empowers you to meet approximately 80% of your annual energy needs with clean, self-generated power. Seize control of your energy future and slash your costs with the sonnenBatterie. Opting for this solution means choosing top-tier safety and quality standards synonymous with the renowned "Made in Germany" label.

The sonnenBatterie Hybrid 9.53 is a reliable and innovative energy storage solution, allowing households to harness clean, self-generated power and reduce reliance on the grid. With its German design and engineering, modular capacity adjustments, and black start capability, it offers top-tier performance and safety standards. The sonnenBatterie Hybrid 9.53 presents a compelling option for those seeking to take control of their energy future with a sustainable and resilient power solution.

Serving Canberra, ACT; Sydney, NSW; Melbourne, Victoria; Adelaide, SA; Perth, WA; Brisbane, Queensland; Hobart, Tasmania; most Australian cities and regional areas including Gold Coast, QLD and Newcastle, NSW.

The sonnenBatterie does not only store energy, it's smart. As an intelligent, backup capable, energy storage system, sonnenBatterie hybrid is best for all new PV installs. Gain your energy independence now and protect yourself against future energy price increases.

It depends on which size of system you choose. A sonnenBatterie Hybrid can be sized with between 2.5 and 15 kWh. This means that you can size the system to suit your needs and you won't have to worry about future energy demands, because you can simply add more capacity at a later date.

The sonnenBatterie Hybrid is available as a DC connected system, allowing for a seamless integration with new solar PV installs. However, we have a sonnenBatterie 10 which is our AC system for homes that already have solar PV installed.

The sonnenBatterie comes with a market-leading warranty of 10 years or 10,000 charge cycles, and a battery service life of 20 years. The performance guarantee states that the battery will be not less than 70% of its installed capacity after 10,000 cycles. This is a market-leading warranty which is founded on the superior battery chemistry that we use in the sonnenBatterie to give a longer service life.

The sonnenBatterie hybrid provides maximum cost efficiency as the system also includes the inverter for a solar photovoltaic system. This eliminates the need for an external device to convert direct current (DC) from the roof into alternating current (AC). This significantly reduces the total cost of a photovoltaic system and the system also becomes more compact and efficient.

Over time, they will be charged and discharged many thousands of times. For that reason the sonnenBatterie is based on the most reliable and sustainable battery technology available and exclusively uses lithium iron phosphate batteries (LiFePO₄). These batteries offer a greater longevity and higher safety than most other lithium-ion batteries that are commonly used in smartphones, laptops or electric cars.
