The Solar Billing Plan (SBP) is a new program for customers who apply for interconnection of an eligible renewable generating system, such as solar or wind, after April 14, 2023. The Solar Billing Plan succeeds the Net Energy Metering (NEM) 2.0 program.

For customers considering solar and other renewable generation¹ at their homes, the Solar Billing Plan is designed to help modernize solar rates to promote grid reliability, incentivize solar and battery storage, and help control electricity costs for all Californians. Each month, billing will include charges for energy used from the electric grid, as well as energy credits exported to the grid.

¹ Renewable generation includes solar, wind, renewable gas, and other technologies that satisfy the CEC Renewable Portfolio Standard (RPS) qualifications.

Residential customers who enroll in the Solar Billing Plan will be transitioned to the TOU-D-Prime rate and will be charged the full retail rate for all energy that they consume. For more information on the TOU-D-Prime rate, visit [Time-Of-Use Residential Rate Plans](#).

To encourage early adoption of the Solar Billing Plan, residential customers who enroll prior to 2028 are also eligible to receive an additional credit. Those enrolling in the first year of the program will receive an additional \$0.04 per kWh for residential customers and \$0.09 per kWh for low-income customers. Currently, three groups of customers are considered low-income:

NEM and SBP applications are being reviewed on a first-come, first-served basis to ensure document requirements are met. If you are looking for SCE Solar Application Processing Data and the solar applications currently under review visit [Net Energy Metering Updates](#).

Whether you want every detail or are seeking specific info, we've compiled frequently asked questions about the Solar Billing Plan so you can find the answers you need easily and quickly.

Most contractors will apply on your behalf, but we've provided all the forms you'll need to submit to get interconnected and enrolled in the Solar Billing Plan.

WASHINGTON, D.C. -- Companies across the United States are investing in record-levels of solar and energy storage to power their operations. According to the Solar Energy Industries Association's (SEIA's) new Solar Means Business...

BOSTON, Mass. -- Today the Massachusetts Legislature passed Senate Bill 2967, critical bipartisan legislation that addresses key challenges facing the solar and storage industry in the Commonwealth. The bill

now goes to Governor Maura Healey"s...

The Solar Energy Industries Association(R) (SEIA) is leading the transformation to a clean energy economy. SEIA works with its 1,200 member companies and other strategic partners to fight for policies that create jobs in every community and shape fair market rules that promote competition and the growth of reliable, low-cost solar power.

Founded in 1974, SEIA is the national trade association for the solar and solar + storage industries, building a comprehensive vision for the Solar+ Decade through research, education and advocacy.
