The village of Darugama lay at the confluence of two streams, the Diyawanna Oya and the Kolonnawa Oya. As Darugama was a naturally secure place, it was not easy for enemies to enter it. Here, in the 13th century, a local chieftain, Nissanka Alagakkonara, built a Kotte, or fortress.

Alagakkonara is mentioned by Ibn Batuta as ruling in Kurunegala, but other sources indicate that he was the Bandara (Guardian) of Raigama Korale (county) in the modern Kalutara District. Arya Chakravarthy"s army was held by Alagakkonara in front of Kotte, while he defeated the enemy"s invasion fleet at Panadura to the south-west.[3]

Kotte was a jala durgha (water fortress), in the shape of a triangle, with the Diyawanna Oya and Kolonnawa Oya marshes forming two long sides; along the shorter third (land) side a large moat (the "inner moat") was dug. The fortress was nearly 2.5 km2 (0.97 sq mi) in area, fortified with ramparts of kabook or laterite rock, 2.5 metres (8 ft 2 in) high and 10.7 metres (35 ft) in breadth.[4]

In 1391, following the conquest of the Kingdom of Jaffna by Prince Sapumal (Sembahap Perumal), Kotte was given the epithet "Sri Jayawardenepura" ("resplendent city of growing victory"). It became the capital of the ancient Kingdom of Kotte, which it remained until the end of the 16th century.

From the ramparts to the magnificent three storied buildings that housed the kings palace, laterite and clay were the main raw material used in its construction. One of the places from which the laterite blocks were mined can be seen even today inside the premises of Ananda Sasthralaya (a local school).

The Portuguese arrived on the island in 1505 and were initially welcomed by the king, but they had militaristic and monopolistic intentions and gained control of the city by 1565. Failing to withstand repeated assaults by the forces of the neighbouring kingdom of Sitawaka, the city was abandoned by the Portuguese, who made Colombo their new capital.[6]

Like similar cities of that era, Sri Jayawardenepura was built with security in mind. A rampart and moat protected the entire city. Traces of this moat and rampart are still visible today at certain places. Along parts of the rampart, encroachers have now built houses, garages and even toilets.

The urbanisation of Kotte restarted in the 19th century. The archaeological remains were torn up and used as building materials (a process that continues)--some of it even ending up in the Victoria Bridge, across the Kelani River.

The Kotte Urban Development Council was created in the 1930s, with a modern building at Rajagiriya. It was succeeded by the Kotte Urban Council, which had a large section of its area removed and tagged onto the Colombo Municipal Council ward of Borella while the Battaramulla urban council was dissolved and a small section of Battaramulla tagged onto the Kotte Urban Council. The Kotte Urban Council became the Sri Jayawardenepura Kotte Municipal Council in 1997, with Chandra Silva as the first Mayor.

There are 20 Members of the Municipal Council (MMCs), elected on proportional representation. There are 18 wards, but these are now merely polling divisions, without individual representation.

Sri Jayawardenepura Kotte is a multi-ethnic, multi-religious urban centre. According to the census of 2012, the demographics by ethnicity and religion is as follows:

The only main railway station is at Nugegoda, on the Kelani Valley Line. Also at Nugegoda is the main bus terminus. There are subsidiary bus stands at Pita Kotte. This urban area is well served by buses and there is a CTB bus depot at Udahamulla.
