Sunrun brightbox cost

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

Batteries are becoming a popular addition to solar panel systems throughout the U.S. and across the globe. Energy storage can provide backup power if the grid goes down and can also help maximize savings in utility territories with time-of-use (TOU) rates or unfavorable net metering policies.

Solar companies are picking up on the trend - many have started offering battery installation as a service to pair with a solar panel system. The largest residential solar installer in the country, Sunrun, has a "solar plus storage" option known as the Brightbox package. Brightbox is available in Hawaii, Arizona, California, New York, and -most recently- Massachusetts.

The Brightbox package is Sunrun's company-branded battery option, launched in partnership with LG. LG Chem's batteries are not an exclusive offering of SunRun; they are also available from other U.S. solar installation companies.

The LG Chem batteries are lithium-ion and come in a variety of sizes. Sunrun offers the LG Chem RESU10H, which can hold 9.3 kilowatt-hours (kWh) of electricity. Sunrun states that their Brightbox package can provide 10+ hours of backup power if the grid goes down.

Sunrun offers a few different financing options for a Brightbox installation. Similarly to solar panels, you can buy or lease the equipment from the company. If you lease, you can choose a prepaid option or monthly payments. SunRun has loan options for the solar panel system and battery if you're looking to buy the equipment.

Sunrun also offers a 20-year full-service plan for the battery should you choose to lease it. Even without this service plan, the Brightbox is backed by LG's warranty of 10 years, which assures that the battery won't lose more than 40 percent of its storage capacity during that time.

Sunrun brightbox cost

Sunrun doesn't share pricing for the Brightbox package on its website. What you'll pay for the Brightbox package can vary depending on the state and your financing option. Sources in New York report pricing between \$6,500 and \$8,000 in addition to the cost of your solar installation, while Sunrun advertises an initial cost of \$1,000 with its leasing arrangement in Massachusetts.

It's also worth noting that Sunrun isn't offering the Brightbox package to homeowners with Sunrun solar panel systems. The Brightbox is only available to customers in the states mentioned above (Arizona, California, Hawaii, Massachusetts, and New York) looking to install a new solar panel system and would like to add storage.

The Tesla Powerwall and Sunrun's Brightbox offerings are similar in multiple ways. Both batteries have lithium-ion chemistry and come with a 10-year manufacturer warranty. Neither Tesla nor Sunrun are the exclusive installers of the batteries they offer.
