When driving for hours on the road, a set of extra batteries for your truck may come in handy. Bring enough back-up batteries for the trip through our strong, lightweight aluminum battery boxes for trucks.

Our metal battery boxes are available in five different styles, four require side-frame mounts, while one is an in-frame mount. All our boxes are easy and quick to install. Our in-frame box even comes with a mounting kit for your convenience. More importantly, our boxes can hold up to six groups of 31 batteries, giving your truckers peace of mind they won't get stranded on the road just because of a dead battery.

For truck drivers. With extra batteries packed in a box under your truck or mounted on the side of the flatbed, you don't have to worry about getting stuck on the road because of a dead battery. These stored batteries also allow you to run any of your equipment in the truck without actually running the engine.

For truck owners. Our battery boxes come in a variety of styles to suit your specific needs. If it's viable to equip your trucks with side-frame mounted battery boxes, we have several sizes and models for you. An in-frame or stack-pack option is available, too. No matter which style you pick, count on a battery box that is strong and durable but is lightweight enough to deliver weight savings.

Moreover, our battery boxes are quick and easy-to-install. Our side-frame mount options require no-drill mounting kit, while our in-frame boxes even come with a designated mounting kit. We help you save time in installation, just like how we keep truckers from getting stuck on a dead battery and delaying operations.

For parts managers. The hallmark of Merritt Aluminum products is toughness. All our boxes are made of high-grade aluminum alloy for a low-weight-yet-high-strength feature that delivers durability. You can count on our battery boxes to impress any of your customers. It's a plus that we offer various models.

Truck battery boxes and mounts

In addition, we're a manufacturer that is easy to work with. Our purchase process is simple: call or email to place an order and then, we'll send your request to a Merritt location nearest to you for quick delivery time.
