

The residential electricity price in the United Arab Emirates is AED 0.293 per kWh or USD 0.080. The electricity price for businesses is AED 0.405 kWh or USD 0.110. These retail prices were collected in March 2024 and include the cost of power, distribution and transmission, and all taxes and fees.

Electricity Generation, Transmission and Distribution of electrical power to cover the needs of the customers at the various residential, industrial and commercial sectors throughout the Emirate of Sharjah as well as the requirements of the public utilities such as government buildings, hospitals, mosques and lighting of public parks, streets etc.

United Arab Emirates fuel prices, electricity prices. The table below shows the most recent prices per liter of octane-95 gasoline, regular diesel, and other fuels. These are retail (pump) level prices, including all taxes and fees. The information is updated weekly. The next table shows the electricity rates per kWh.

Fuel surcharge are calculated based on electricity consumption (Fils/kWh) & water consumption (Fils/IG) and included in the monthly bill. Fuel surcharge vary based on increase or decrease in fuel prices supplied to DEWA generation plants.

The current tariff intended to promote efficient consumption of electricity and water at a time it is increasingly needed, equally in the conservation and preservation of our precious resources. The Sharjah Electricity, Water, and Gas Authority (SEWA) is dedicated to delivering essential services that empower the growth and prosperity of Sharjah and its residents. As the primary provider of electricity, water, and gas in the emirate, we are committed to ensuring that every home, business, and institution has access to reliable, safe, and sustainable resources.

Meeting customer satisfaction through delivery of reliable services of electricity and water and piped natural gas at an excellent level of safety and quality standards in line with the most advanced technologies and under

supervision of qualified and skilled workers.

Generation, Transmission and Distribution of electrical power to cover the needs of the customers at the various residential, industrial and commercial sectors throughout the Emirate of Sharjah as well as the requirements of the public utilities such as government buildings, hospitals, mosques and lighting of public parks, streets etc.

SEWA is committed to providing all parts of the Emirate with drinking water from both underground and desalination sources. SEWA has established modern desalination and production plants to produce and treat seawater and underground water to be distributed to residential, commercial and industrial customers via our transmission & distribution networks.

SEWA has introduced piped natural gas service for domestic, commercial and industrial uses in Sharjah City. In conjunction with this new service, SEWA also arrange conversion of cookers and ovens fired by PLG cylinders to the natural gas system to be supplied by Sharjah Gas Distribution Networks which is covering all parts of Sharjah.
