

Vanuatu energy conservation

The retail price of diesel remains 183 VT/L. The retail price of benzene will be 200 VT/L, effective May 22, 2024.

The retail price of diesel has dropped by 9 VT/L to 174 VT/L effective June 20, 2024. There is no change for the retail price of petrol and remains at 200 VT/L.

The retail price for petrol has dropped by 8VT/L, from 200VT/L to 192VT/L, effective from July 5th, 2024. The retail price of diesel remains at 174VT/L.

Our goal is to provide content that will be useful and attractive to all our major stakeholders, and the public. We have designed the site so that your stakeholder "role" will lead you to useful content.

I am excited to have you on board as we journey and build together in 2019 and beyond. The sky is our limit and the mission is to endeavour to build its capacity and evolve into an institution that is well represented and deliver on time for its government and people into the near future.

One of the most effective measures is using energy efficient electrical appliances, equipment's and lighting products in order to reduce the consumption of fossil fuels, save money and reduce the greenhouse gas emissions.

Joomla! really needs a good powerful default template, instead of complaining or waiting, we went ahead and hopefully this will encourage others also to address the default templates issue of Joomla!..

In 1986, the Department Environment Protection and Conservation (DEPC) began as the Vanuatu Environment Unit. Today we are formally recognised as a department under the Ministry of Climate CHange Adaptation, Meteorology & Geo-Hazard, Environment, Energy and Disaster Management.

The vision of DEPC is "leading Vanuatu to a clean, resilient and sustainable environment" and its mission is to achieve its vision by leading by example "Think Environment First: Show People!"

Over the years, the Vanuatu Government has introduced a number of pieces of environmental legislation, but not all of this legislation falls under the mandate of the Department of Environmental Protection and Conservation (DEPC).

Some environmental legislation is administered by other government agencies such as the Ministry of Agriculture, Livestock, Forestry, Fisheries, and Biosecurity and the Ministry of Lands and Natural Resources.

# Vanuatu energy conservation

The DEPC aims to protect and conserve natural resources, biodiversity and significant species and their ecosystems for everyone. Be alert and prepared for climate change adaptation and mitigation.
