

# Victoria solar energy

Victoria solar energy

Helping Victorians make the switch to solar, recharge with a battery or tap into savings with energy efficient hot water, and build a cleaner, renewable future. Check your eligibility for Solar Victoria programs and learn how to apply.

We provide a rebate of up to \$1,400 for the installation of solar panel (PV) systems. These rebates are offered to Victorians with existing homes or homes under construction. There are also solar rebates for rental properties.

Rebates are released each month according to the scheduled rebate release dates. You can reduce your upfront cost further by applying for an interest-free loan to match the rebate amount.

\*If you are participating in the Premium Feed-in Tariff scheme you should consider whether you will be better off if you replace your existing system before the scheme ends on 1 November 2024.
