

Wind power installers near me

Wind power installers near me

Our crews provide end-to-end services to the wind farm industry including power collection systems, substations, interconnection services as well as complete EPC/BOP solutions for private developers, electric utilities and government organizations across the country. We're equipped with an extensive fleet of support and erection cranes, allowing us to safely handle today's tallest sections and fly the heaviest turbines.

Whether we're working with your engineers or facilitating our own design, we are wind farm construction contractors that help our clients meet both short- and long-term power demands. We keep abreast of current equipment, methods, and systems developments, ensuring that we deploy the latest solutions and most comprehensive safety practices. We also maintain a focus on environmental stewardship, and work to minimize our environmental impact at wind energy construction sites, as well as in the solutions we deliver.

Vibrant Energy Solutions is a full-service wind turbine installer and wind energy development company. We can assist with the start to finish development of your wind project, beginning with an initial wind assessment and ending with an operating wind turbine.

Vibrant Energy Solutions is a full service wind project development company and turbine supplier. We understand that each project is unique and will work with you to customize a development plan that fits your schedule and budget.

Recycling options for Wind Turbines vary greatly in methodology, cost, and return. It's crucial that turbine owners choose their downstream partners wisely, both for optimal return and responsible disposition.

WindTurbines provides our clients with the confidence that their wind turbines are being processed in a responsible and cost-effective manner. Raw materials are shopped globally to find the most attractive bulk pricing from trusted partners and we also ensure environmental regulations and security are adhered to with our local processors.

Vibrant Energy Solutions brings the opportunity of self-generated electricity from an abundant wind resource to independent owners. We work with farm/residential scale turbines (1kW to 100kW) as well as larger-scale turbines for mid-sized projects (100kW to 10 MW).

We serve as a full-service wind project development partner to landowners, farmers, municipalities, companies and communities to help them take advantage of their local wind resource.

Before handing over to operations and maintenance, we test all aspects of the turbine and the electrical infrastructure, as well as inspection of routine civil engineering quality records.
